

***Speak, smile, and drink normally in about half the time***

Dr. Frieder wants you to have the most comfortable experience possible while at our office. Our commitment to our patients begins when you enter our office and extends long after you leave. If you are one of the many patients who dislike lingering numbness from local anesthesia, OraVerse may be just the answer for you.

- OraVerse rapidly reverses the effects of your local dental anesthetic after routine dental procedures.
- It is scientifically proven to accelerate the return of normal sensation in the lip and tongue.
- A return of function such as speaking, smiling, and drinking allows you to get back to your day.

The next time you need to have dental treatment, ask Dr. Frieder if OraVerse would work for you and ***Get on with your day.***
